

Magnetic Conveyors

Apical Conveyors System's **Magnetic Slide Conveyors** feature an **oil-filled UHMW chain** guide which requires no lubrication, a watertight submersible frame, an automatic die spring take-up device, a 12-gauge stainless steel bed, heavy-duty oversized roller chain and powerful ceramic #8 magnet assemblies enclosed in stainless steel. This conveyor has no external moving parts (except for the drive), is easily installed and is **virtually maintenance free!**

Low Profile Conveyors

Apical Conveyor Systems offers low profile conveyors designed to be an economical fit for projects in which the side profile height is critical. The 1 3/4" frame height (without side skirting) or 2 7/8" frame height (with side skirting) is ideal for take-away of stamping machines, light metal or plastic parts, cardboard die-cuts, various food industry needs along with a large range of other materials. **Constructed of 12-gauge material with standard pre-engineered designs and quick deliveries available. Standard live load capacities 10 lbs/ft. up to 100 lbs maximum.**

Box Wall Conveyors

The corrugated sidewall along with superior hold downs make this the ideal economical choice for handling powders, fines and product smaller than 1" in size. Options available for various levels of washdown, stainless and food handling requirements. **Constructed of 10ga or 12ga material. Live load capacities from 20lbs/ft. up to 1000 lbs maximum.**
