

INTRODUCING **RML 100**

December 6, 2023

Dear Buyer,

I am pleased to announce the retirement of our Moly 925R conveyor chain lubricant. For almost 30 years Apical has been applying our premium Moly lubricants to a variety of conveyors across south western Ontario.

Our high temperature Chain Lubricant **RML 100** comes with a few advantages. The new 20 L pail has a new label and pouring spout, **RML 100** Lubricant can be dispensed in 200 L drums or 1,000 L totes.

Molly 925 was introduced as a superior high temperature chain oil lubricant. However, over the past 3 decades there has been major improvements with oil manufacturing and chemical additive packages available at our disposal. We have taken advantage by making minor changes to improve our chain lubricant. Our most notable revision was switching to an organic Moly. Our goal is to move towards minimizing the environmental impacts of our products. The functionality of **RML 100** Lubricant is the best that this industry can offer and is compatible with Moly 925R.

All future PO's should have the product identifier as **RML 100**.

The SDS sheet for **RML 100** is attached to this email. If you have any questions or concerns you can contact me at 519 801 0828 or terry@apical.ca

Sincerely yours,

Terry Mailloux

Apical Conveyor Systems Inc.
